Languages: TypeScript, JavaScript, Java, HTML5, LESS/CSS, Python

Frameworks: React/Redux, Jest, WebdriverIO

Software: IntelliJ, VS Code, Xcode Simulator, Git, Bitbucket, Jira, Figma, Kibana, Slack

Professional Experience

KAYAK | Software Engineer | Sep. 2022 - Sep. 2024

- Transitioned static website to fully responsive React pages across multiple user agents
- Maintained website health through the monitoring of dashboards and alerting
- Implemented a Redux workshop highlighting best practices within the codebase
- Directly collaborated with PM and UX on design and implementation of new features
- Opened and reviewed PRs with attention to clear and concise code practices
- Ensured the health of the website with unit and E2E tests
- Harmonized features across 7 core brands and 63 locales

KAYAK | Software Engineer Intern | May 2022 - Aug. 2022

- Analyzed legacy code and drafted documentation for future migration
- Refactored and migrated legacy components to React framework
- Practiced Agile development using sprints with grooming, planning, and review sessions
- Added reusable components to the Sandbox playground for developer visualization

Projects

Portfolio (JavaScript, CSS, React): Spring 2022 - Present

- Working on a personal portfolio website using React framework
- Available at <https://wyattbliss.com>

NBA App (JavaScript, React): Spring 2022 - Present

- Developed a website using React and Redux that displays current NBA game data
- Utilized a web crawler to retrieve current standings as well as API libraries to retrieve live game and player data

Interests

MN/NV Sports Teams, Cars, Video Games, Traveling, Golf, Basketball
